

PLANNING STUDY PREPARATION

After much prayer and considering the long-range needs at Grace, we have determined that we must expand our facilities since our ministries are bursting at their seams.

The proposal is to connect the front door of our current building to a new three-level 60,000 square foot addition that will provide:

- A 300-seat auditorium for Student Ministry and overflow for weekend services
- Expanded space for all REACH ministries
- Gathering areas for fellowship, including a larger foyer and coffee shop
- Additional meeting rooms and other spaces
- 100 new parking spaces

Before we move forward, we need to hear from you. We have hired the Steier Group, a development firm, to conduct a planning study, which we are beginning now.

The Planning Study provides an opportunity for the entire church community to participate. Your feedback will let us know the most important additions of this project and measure support for a potential major fundraising effort – called a capital campaign – to pay for all, or some, of the project.

We will share more details about the study, the project and a potential fundraising campaign in the coming weeks.

God Bless,
